

Capture The Flag

Sponsored by

1. Description:

This series of exciting hackathons, where Web and App developers will get a chance to build the product according to the requirements given by the experts of the domain. These hackathons help you put your coding and development skills to work and solve interesting problems and real-life challenges. The basic challenge is to search for 3 flags hidden in the machines that will be given to each participant, within a limited time of two hours. The participant will be ranked based on the time taken to collect each flag. Each participant will be given only an IP address and no other information. Before the challenge starts, each participant will have to register themselves as a new user in our gamified portal, where they will be required to submit the flags they collect, as part of the challenge. Before the start of the Challenge, each participant will be provided the IP address by mail. The registration link is provided on the website.

2. Team Size

It is an individual event.

3. Eligibility

Fill the registration form to be eligible for the event: [Link](#)

Any student from a recognized institute/college can participate in this event.

4. Judging Criterion

- The participant will be ranked based on the time taken to collect each flag.
- The least time will get the first rank.

Remark: All decisions taken by the organizing team will be deemed as final, and no more changes will be encouraged, thus holding the full authority to change any of the above rules as per circumstances.
